SUMMARY

Systems Analysis and Development student and data & development intern at Uono Sanchez, where I build and maintain production Python automations that integrate web systems, HTTP endpoints, files and spreadsheets. Day to day I work with Git, Docker, log-based debugging and agentic AI-assisted development (Claude Code), always critically reviewing generated code before it reaches production. I have a foundation in Java/OOP with Spring and in SQL, and I'm growing toward back-end work with NestJS, TypeScript, microservices and AWS.

WORK EXPERIENCE

Data & Development Intern – Uono Sanchez Aug 2026 – present

- Python and Playwright bot that exports Itaú reports, registers proposals and assigns the responsible engineer.
- Safeguards on a payment-related flow: taxpayer ID (CPF) matching, preview mode, idempotency and deduplication.
- Python desktop app (Tkinter) used by my team: builds the photo report in each bank's template, versioned .exe.
- Integration with internal HTTP endpoints, production bug fixes from logs and performance tuning.

Data Analysis & Processing Intern – COHAB SP Jan 2025 – Feb 2026

- Analyzed and processed large volumes of housing credit data.
- Automated recurring tasks with advanced Excel, macros and VBA.

PROJECTS

Inspection registration bot – anonymized version github.com/rafaelbertochi1/robo-cadastro-banco-a

- Python and Playwright: moves inspection statuses from a portal into the management system, without duplicates.

Property appraisal pipeline – anonymized version github.com/rafaelbertochi1/pipeline-laudos-banco-b

- Downloads reports, extracts PDF data and photos and loads them into PostgreSQL (Docker); accuracy checked on 500 reports.

Appraisal photo app – anonymized version github.com/rafaelbertochi1/app-fotos-laudos

- Python desktop app (Tkinter, openpyxl) that builds the photo report in each bank's template; regression tests.

Real estate data pipeline – thesis github.com/rafaelbertochi1/Web_Scraper_TCC

- Collection → ETL → relational database → analysis, with decisions in ADRs, respecting privacy law (LGPD) and robots.txt.

TECHNICAL SKILLS

- **Languages:** Python, Java/OOP and C++ (intermediate), HTML/CSS (basic); familiar with JavaScript/TypeScript and Node.js.
- **Back-end & integration:** Spring (courses), REST APIs and HTTP, system integration, web automation with Playwright.
- **Databases:** SQL (intermediate), relational modeling, Oracle/PL-SQL.
- **Tools & infrastructure:** Git/GitHub, Docker, AWS basics, Python virtual environments, log analysis.
- **Agentic AI:** Claude Code in daily development, with critical review of generated output.
- **Data:** Advanced Excel (macros and VBA), Power BI.

EDUCATION

Associate Degree in Systems Analysis and Development Aug 2024 – Dec 2027 (expected)

Fatec Mogi das Cruzes (São Paulo State Technology College)

COURSES & CERTIFICATIONS

- Java Back-end with Spring AI (NTT DATA) • Java Immersive Course (Rocketseat) • Python Course (Santander Open Academy)
- Databases for Developers: Foundations (Oracle) • Power BI Fundamentals (Santander Open Academy)
- Hardware Lab (Cisco) • Network Security (Cisco) • Marketing Technician (ETEC Martin Luther King)

LANGUAGES

Portuguese: native | **English:** advanced – B2 (TOEIC)
